

AQUA TRAC

THE POWER OF KNOWING™

YOU CAN'T MANAGE WHAT YOU CAN'T MEASURE

Aqua Trac gives you the power to track and measure soil moisture conditions in your fields remotely so you can manage your irrigation operations efficiently and effectively.

- Easily implement irrigation decisions based on soil moisture profile with the click of a button.
- Read several major soil moisture probe brands, including AquaCheck, Sentek, Decagon, and Watermark.
- Data is pushed directly to simple, easy-to-read graphs on the AgSense® Dashboard.
- View moisture conditions on WagNet.net, or with the free AgSense App on a smartphone or tablet.
- Take the guesswork out of sub-surface soil moisture content to prevent irrigation mistakes, saving time, water, and money.
- Keep fertilizer and crop protection chemicals in the desired root zone and prevent ground water contamination.
- Automatically share results with your agronomy partners in electronically easy-to-read graphs and charts.
- Keep tabs on root zone activity, and use irrigation rate and timing to optimize root development.
- Available through multiple AgSense agronomic partners as part of their irrigation management program.

AQUA TRAC PRO

Reads a Digital Capacitance Probe and/or Watermark Sensors, Drip Pressure Transducer, Flow, Temperature, Rainfall and Tank/Pond Levels.

AQUA TRAC LITE

Reads a Digital Capacitance Probe, Flow, Temperature and Rainfall.

EASE OF USE

AgSense has a simple, easy-to-understand user interface that makes it possible to monitor and control all your AgSense devices from virtually anywhere in the world.

WagNet features Google Maps™ and user-configurable alarms that put you in control of when, why and who should be notified when a problem occurs.

LOCAL DEALER SALES & SUPPORT

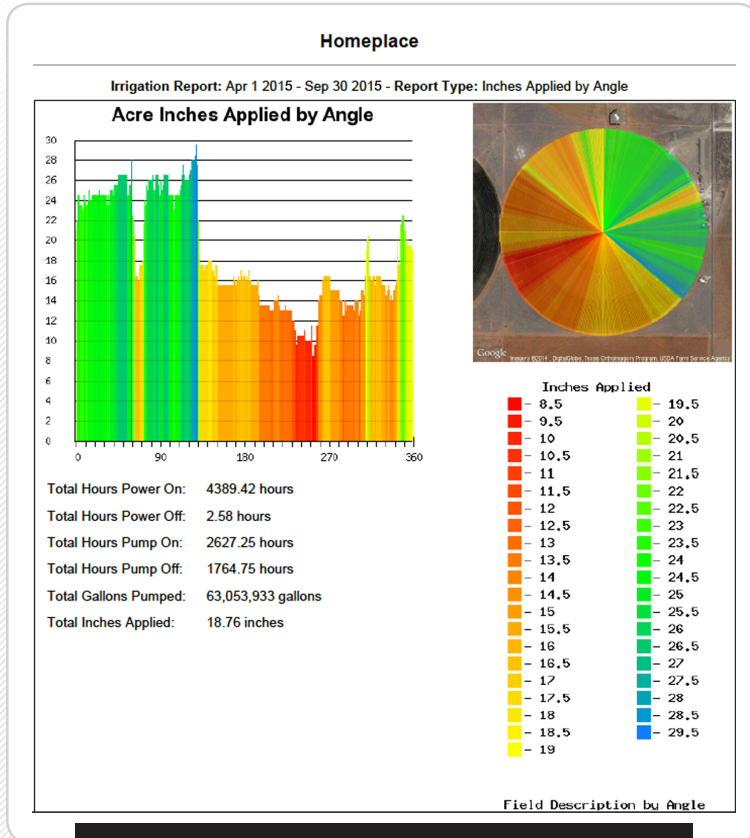

AgSense® has an extensive network of dedicated dealers located throughout the United States and Canada. Our dealers offer local sales and support in addition to our national support.

To find a dealer near you, please call us at (605) 352-8350, or email sales@agsense.net.

BETTER INFORMATION = BETTER DECISIONS

AgSense not only tells where you are and where you are going - powerful reporting tells you where you have been. Comprehensive and customizable historical reports, graphs, and exportable files are available under the Reports tab on your device page.

CROP LINK®

Create custom tailored Crop Link reports that allow detailed evaluation of historical data. Reports include: pump hours, sensor readings, precipitation, wind measurements, leaf wetness, solar radiation, evapotranspiration, flow, and pressure.

FIELD COMMANDER® & COMMANDERVP™

AgSense stores historical data that will generate customizable reports that are compatible with virtually all center pivot and lateral machines. A sampling of reports includes: total gallons pumped, acre-inches applied, energy consumption, application history, Water District usage reports, command history, and data readings history log.

WHY REPORTING?

Water is a finite resource. Reporting lets you track your water usage so you can maximize efficiency. Improve crop yields by putting the right amount of water in the right place at the right time.

By knowing what you've applied by angle, you remove the guesswork and can make adjustments to the irrigation schedule.

AQUA TRAC

Aqua Trac allows you to generate custom reports with lifetime field data. Reports can be sorted to display the data of each individual sensor, including rain and temperature. Or if you prefer, the data from the sensors can be grouped together and displayed as an overall average.
