

What To Expect

In recent years, high commodity prices may have allowed for some less-than-perfect management practices, but with today's market, that's a costly mistake. At our Open House, we'll showcase innovative products designed to help boost efficiency and keep your operation running smoothly. Here's a sneak peek of what to expect!

Austin VanHorn
The Drone Guy

Drones

Explore our drone lineup, including Mavic 3T, Mavic 3M, M30T, T25, and T50, along with Pivot Socks for unsticking pivots, RTK for precision, crop spraying solutions for leafy spurge and thistle, cover crops like radishes and rye, and custom drone support rigs!

Devon Chambliss
Agronomist

SWATmaps

Unlock your soil potential with management zones tailored to soil and topography, linking soil tests to prescriptions. Use the SWAT Records app on any device, trusted by 99% of users across 3.5 million acres in four countries. Learn more at swatmaps.com.

Tiffany Hemenway
and Rachelle Green

Insurance

- PFR for pastures
- LRP for livestock
- MPCJ for crops

Jessica Korinek
CEO, Nave
Analytics

Nave Analytics

Experience field-level water content simulation at various depths (2", 6", 12", and 24") with near real-time irrigation analytics and a one-week forecast. Learn more at naveanalytics.com.

James Herrick
Customer Success
Manager, Sentinel
Fertigation

Sentinel Fertigation

Achieve optimal nitrogen for your crops with real-time, imagery-based nutrient recommendations. Save money and protect the environment with precise fertilizer use, backed by 10 years of UNL research. NRD cost share available. Learn more at sentinelfertigation.com.
